

Delivering a Better Experience for Today's Ultrasound Providers and Their Patients

November 15, 2022

Healthcare professionals across the country are familiar with EcoVue® Ultrasound Gel and the superior value and exceeding quality that comes with using an HR Pharmaceuticals product.

Recently, [HR Pharmaceuticals](#) expanded its ultrasound product offerings to include ultrasound probe covers and LCD digital display gel warmers to continue to drive bottom line value while delivering a better experience for today's ultrasound providers and their patients.

CoverAlls™ Ultrasound Probe Covers

CoverAlls™ Ultrasound Probe Covers provide a protective barrier to prevent cross-contamination and meet infection control guidelines.

Featuring a telescopic-fold with a 3D box end, users can easily apply gel and cover the transducer while maintaining a sterile field, saving valuable time before and after each procedure. The 3D box end also ensures no seams interfere with the probe's sensors.

Available in 48" and 96" lengths, each kit includes a probe cover, EcoVue® HV Ultrasound Gel Sterile 20g packet, and two elastic bands.

Acclimate® Gel Warmer

The Acclimate® Gel Warmer is specifically designed to warm EcoVue® Ultrasound Gel but is capable of warming other products.

Equipped with easy button controls and a safety door to keep the product safely inside without accumulating dust or bacteria, the Acclimate® Gel Warmer is now available in three models – single-use packets, multi-use bottles, and FlexPac®. The patented design evenly warms ultrasound gel to the desired temperature while allowing users to monitor and regulate the temperature (95°F – 105°F) with an LCD digital display.

The Choice is Clear

When you need a gel designed with patient needs in mind, the choice is clear with EcoVue® Ultrasound Gel. And, when paired with CoverAlls™ Ultrasound Probe Covers and the Acclimate® Gel Warmer, your ultrasound department will be fully prepared to deliver a better experience and improve patient satisfaction.
