

Coronavirus and Capillary Blood Sampling Tests

By HTL-Strefa

April 02, 2020

As part of a leading global healthcare group, we at **HTL-Strefa** share the world's concern for those impacted by the COVID-19 pandemic and the unprecedented disruption to the global supply of much needed medical supplies. We believe strongly in our shared responsibility to help all those in need during this difficult time.

Having invented the safety lancet in 1994, we have become a global reference and preferred partner for capillary blood diagnostics and safety medical sharps. We are here to help meet your medical crisis needs now in order to guarantee those at risk receive the testing and potential treatment they need to help ensure better outcomes.

We have a large US domestic supply of multiple product lines of safety lancets for finger capillary blood sampling (see below). These safety lancets are designed and proven to obtain various blood volumes measured in microliters (μ) for various assays inclusive of COVID-19 and are available for immediate delivery.

Product name	Product Photo	Product Code	Gauge (G)	Puncture Depth (mm)	Blood Volume (μ l)
Acti-Lance Universal		7156	23	1.8	73
Medi-Safe Solo		7140	23	2.0	87
Medlance Plus Extra		7045	21	2.4	105
Haemolance Plus Low Flow		7371	25	1.4	105

For more information about these and other safety lancet products, where they are available, and how to order, please contact:
