

TRIOSE Novaplus Contract SV3043

Effective 6/1/22

TRIOSE delivers full-service, customizable supply chain management solutions across the entire healthcare continuum.

Small Parcel and Large Cargo

The TRIOSE freight management program provides a fully managed logistics solution for inbound and outbound shipping, as well as large cargo freight transportation through hundreds of national, regional, and international carriers. As part of our fully managed program, TRIOSE customers have the advantage of increased visibility and control over their supply chain with a team of experts working on their behalf to ensure program success. We have valued partnerships with multiple small parcel carriers, making us the only carrier agnostic supply chain provider in the industry. Dedicated logistics experts will work directly with you to determine the best small parcel carrier for your needs.

Pharmacy and Last Mile

Pharmacy^{IQ} streamlines clerical, accreditation, and compliance work which enables pharmacies to grow profitably and help improve their health system's net operating income, while providing exceptional customer service to patients.

TRIOSE Last Mile provides the standards to ensure that chain of custody and package integrity is maintained throughout the journey from provider to patient.

Courier and Fleet

Courier^{IQ} solution provides a fully managed internal and external courier transportation program for healthcare systems, facilities, pharmacies, and laboratories to ensure quality, timeliness, and mitigate risk.

Fleet^{IQ} provides system-wide asset management technology to help health systems keep their fleets running efficiently and within budget.

INNOVATIVE AND INTELLIGENT LOGISTICS SOLUTIONS WITH WHITE GLOVE SUPPORT YOU CAN COUNT ON

Delayed or misplaced shipments can cost you time and jeopardize your ability to provide the care your patients need. TRIOSE provides the technology, data, and industry expertise to provide actionable insights into smarter business decisions and financial success. We offer customized supply chain solutions from managing small parcel & large cargo shipping, to providing courier, fleet, and pharmacy solutions. Our strategic partnership with UPS uniquely positions us to prioritize, manage, and support our healthcare clients' shipping needs through dedicated resources.

Enhanced Vendor Compliance

Strong vendor relationships are critical to a successful freight management program. Through our industry experience, we have forged long-lasting vendor relationships that contribute to our customers' success. Our trusted partnerships continue to drive advancements within the healthcare supply chain.

Support You can Trust

When healthcare facilities partner with TRIOSE, they receive a full-service account management team. Account teams are comprised of TRIOSE employees from all departments to oversee vendor compliance, logistics coordination, cost allocation, freight invoicing, auditing, and claims support.

Savings from your first shipment

TRIOSE's seamless implementation means you see immediate improvements.

“As our logistics partner, TRIOSE was able to work with key suppliers and freight carriers, in order to facilitate enough water to meet the various needs of Houston Methodist. Without that assistance, we would not have been able to provide the much-needed support to our staff and most importantly, the patients we work so hard to serve.”

- John A. Walters, Corporate Director, Supply Chain Logistics, Fleet Management, Distribution Center at Houston Methodist.
